

The life-cycle of a PhD trajectory

A (humoristic) diary of an epic voyage to the academic world...

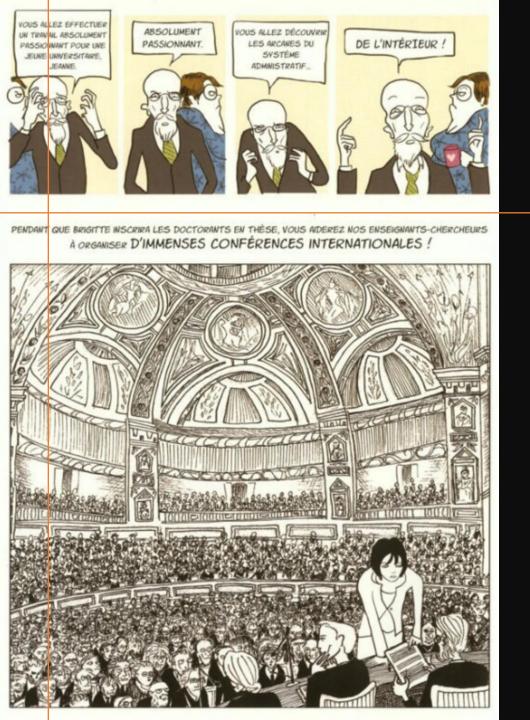

Taking the risk of starting a PhD journey

2. Being really sure about the decision......and about your expectations

3. Diving into the ocean of knowledge & experiencing creative uncertainty

4. Acquiring the habitus of academic life & exploring the rituals of science

Digesting knowledge, developing & testing hypotheses...

thinkering...

7. Dealing with frustrations & existential doubts

8. – 31. Overcoming unexpected hurdles 32. Being flexible and adapting to unforeseen circumstances

PLUS LONGUE, ELLE NE DURE JUSTEMENT QUE LE TEMPS QUE TU PERDS ! QU'Y GAGNER, TU NE COURS AUCUN RISQUE

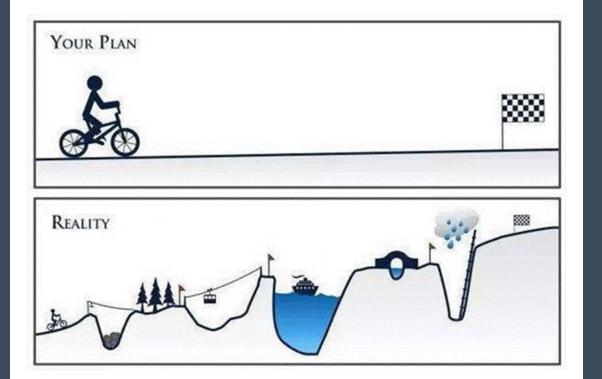

33. Succesfully defending your thesis

34. Dealing with the "PDD symptom"

"Post-Defense-Depression"

Eva O. L. Lantsoght

The A-Z of the PhD Trajectory

A Practical Guide for a Successful Journey

Deringer

Doing a PhD is a contract between student & supervisor(s)

Supervision

- Doctoral Education Agreement
- Research and Training Plan (Doctoral Schools / Doctoral Training Units)
- Comité d'encadrement de thèse
- is about *competences & skills*
- and is *goal driven*

Mentoring / Coaching

- is about *values*
- and process driven

Doing a PhD is a contract between student & supervisor(s)

Shared authority -Shared responsibility!

Regular meetings !

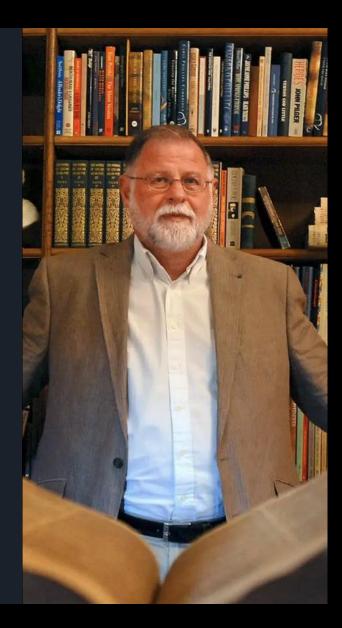

Expectation management & career planning "Reading Mr. Manguel is like taking a city walk or an unhurried meal with an erudite, cosmopolitan friend."—The Economist

Imagination & Curiosity

 "A teacher can help students discover unknown territories, provide them with specialized information, help create for themselves an intellectual discipline, but, above all, he or she must establish for them a space of mental freedom in which they can exercise their imagination and their curiosity, a place in which they can learn to think."

Passion

Failure is also a test of dedication. It is a way to measure what you are passionate about and how deep that passion runs and how dependable it is. Science may seem methodical but it demands passion.

FAILURE

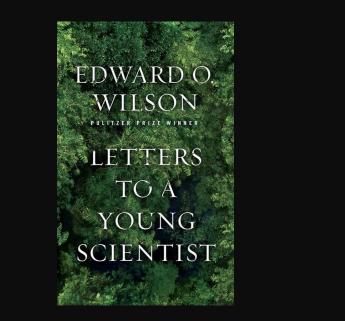

WHY SCIENCE IS SO SUCCESSFUL

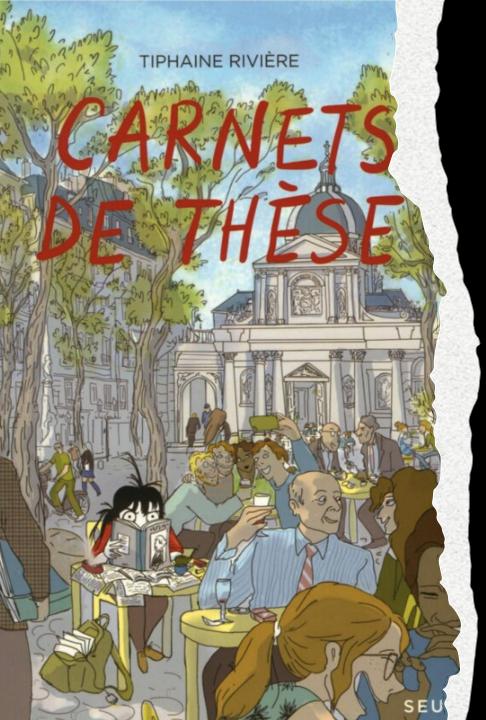

STUART FIRESTEIN

Perseverance

"Choose a goal that seems right for you and strive to be the best, however hard the path. Aim high. Behave honorably. Prepare to be alone at times, and to endure failure."

Après trois ans de thèse de littérature et un travail administratif au sein de l'école doctorale d'une grande université parisienne, Tiphaine Rivière a ouvert un blog illustré, «Le bureau 14 de la Sorbonne», et a choisi la bande dessinée.
